THE LANGUAGE WOMEN SPEAK

“The Language Women Speak” presents a loving, diverse and often deeply personal look at the world seen through the female gaze.

A record number of participating artists – 87 with 50 being new to the Center – range in age from twenty-something to nearly 102. Works include traditional subject matter and media as well as innovative concepts and unique media.

The largest art show in the Price Center’s history hangs throughout all the first-floor venues until the end of April and most of the works are available for purchase.
